

Naming Process Overview

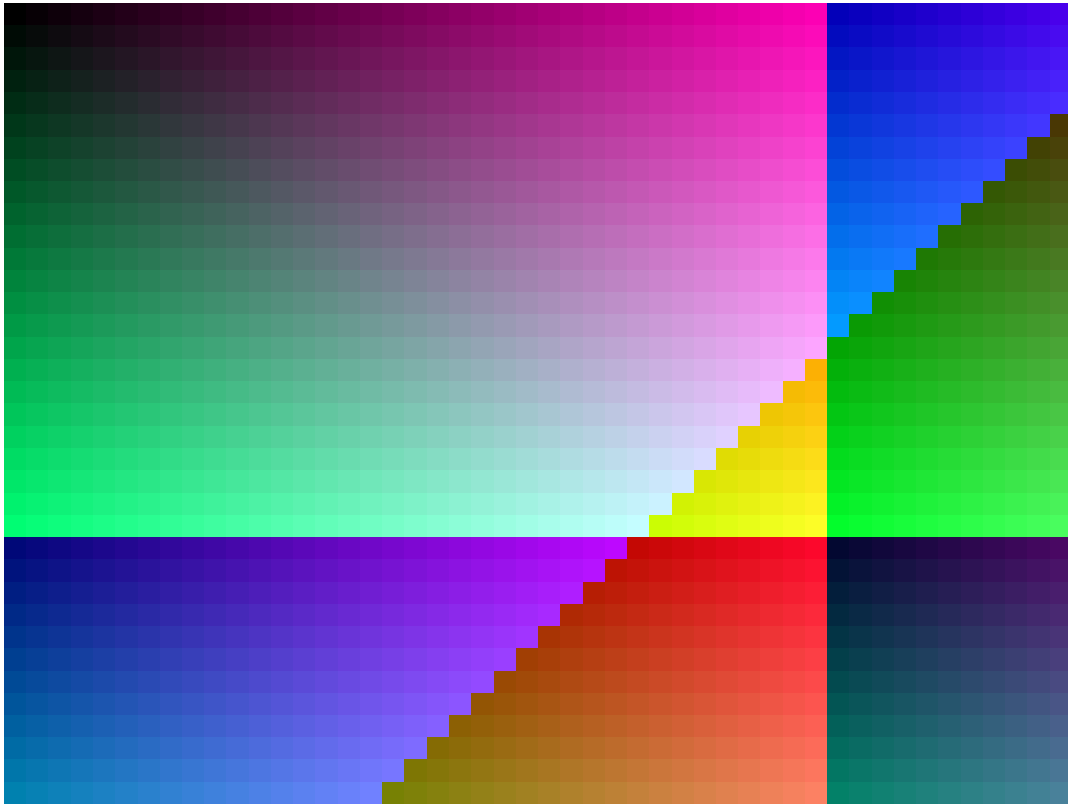

To help determine the best name and identifier for an acquired affiliate, the identity program provides these tools. Before permitting an acquired affiliate to adopt any name or graphic identifier, you must ensure that minimum ownership requirements are met, that all required approvals are obtained, and that a written trademark license is granted as set forth in the documentation. Thus, before proceeding, obtain the document from the identity website or hotline and familiarize yourself with it.

Exhibit Layout - Landscape

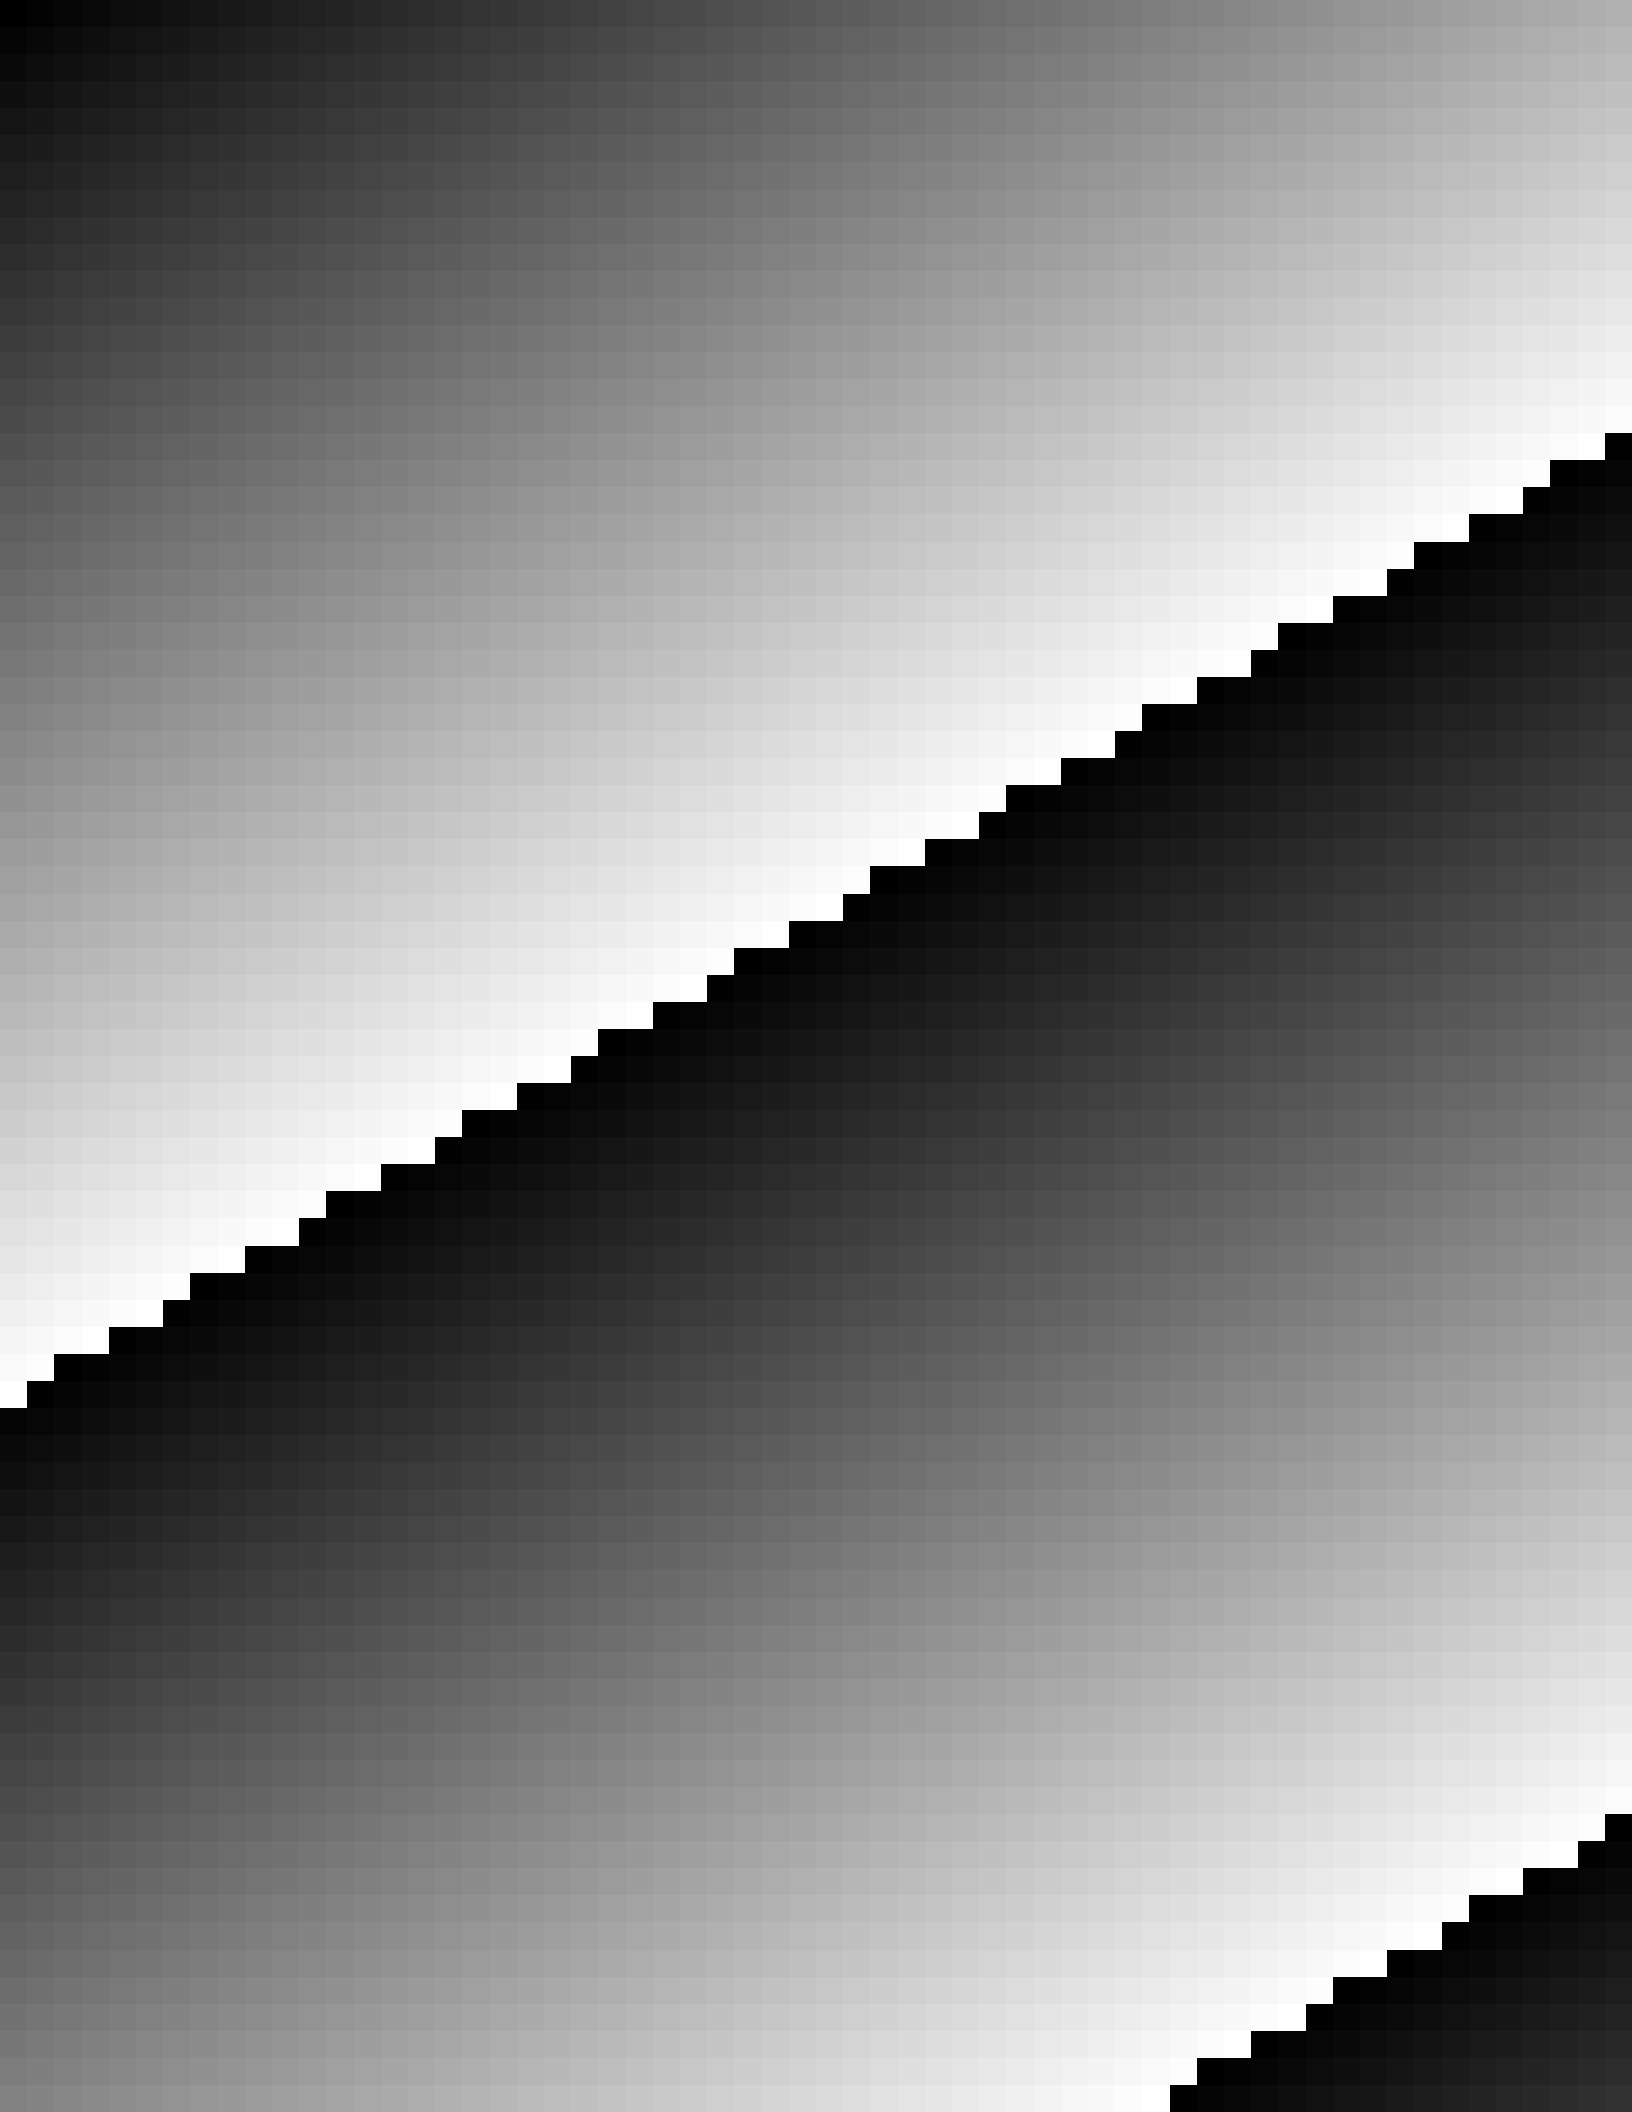

A page whose orientation differs from its neighbours.

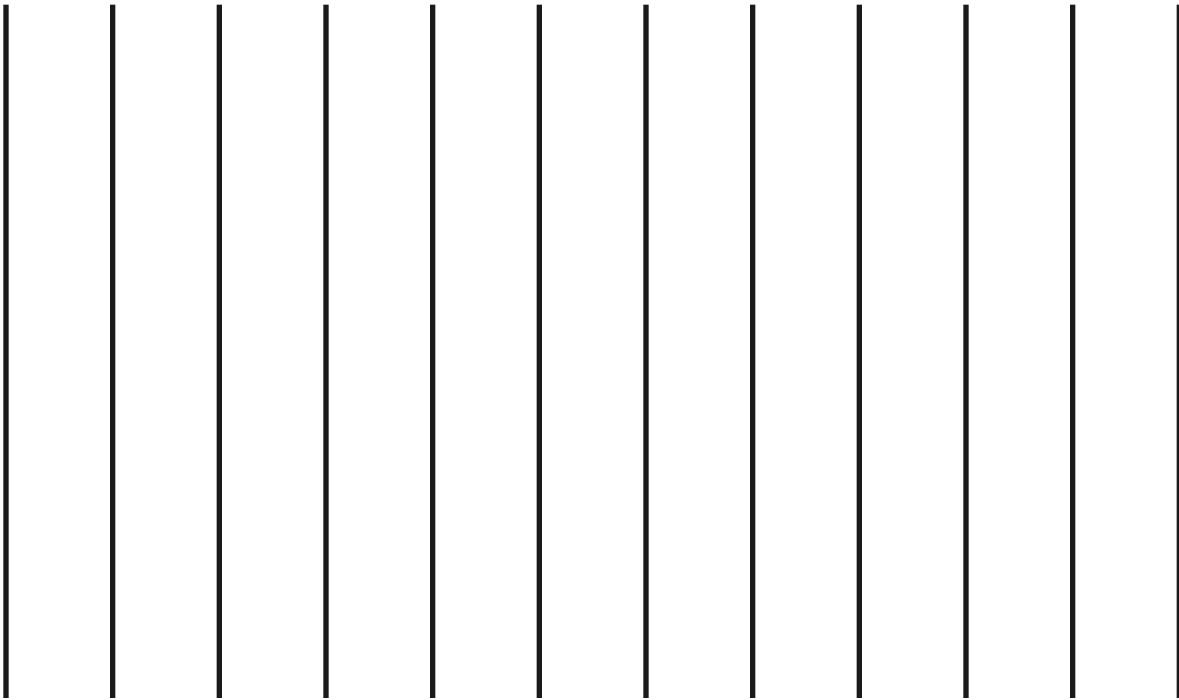

Promotional Brochures

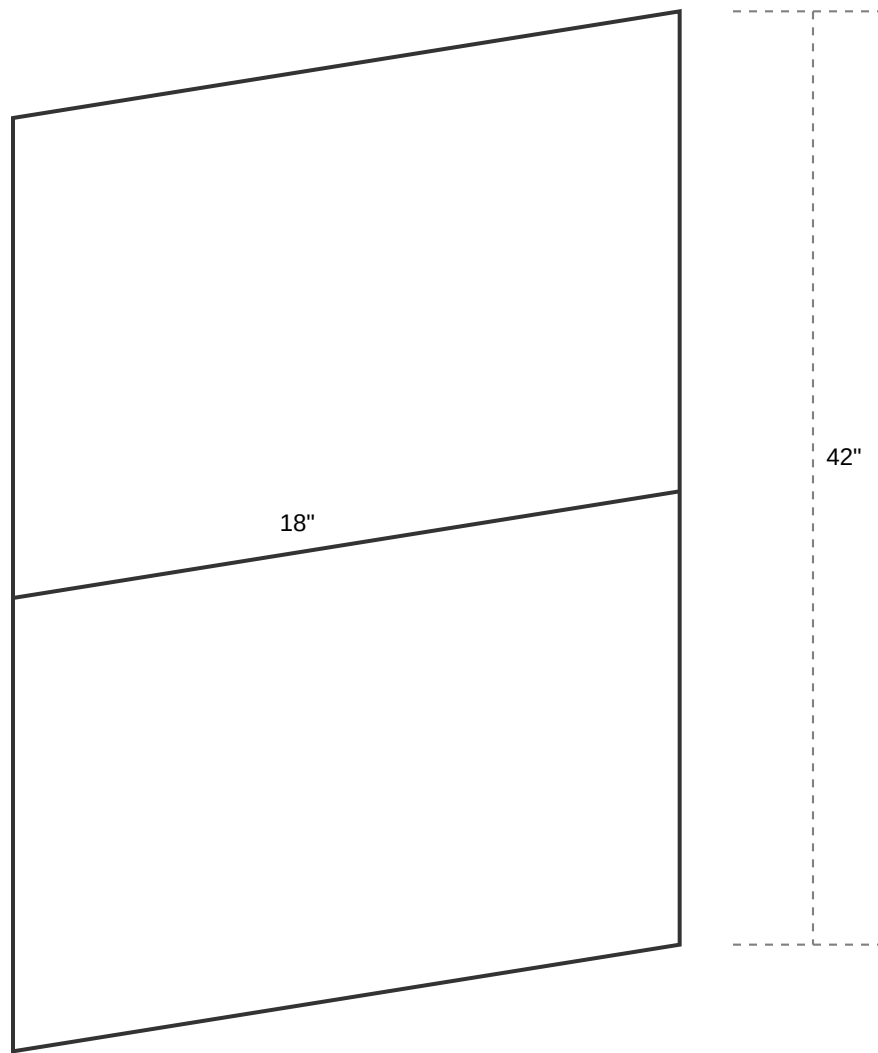

Photography shows the product in real application.

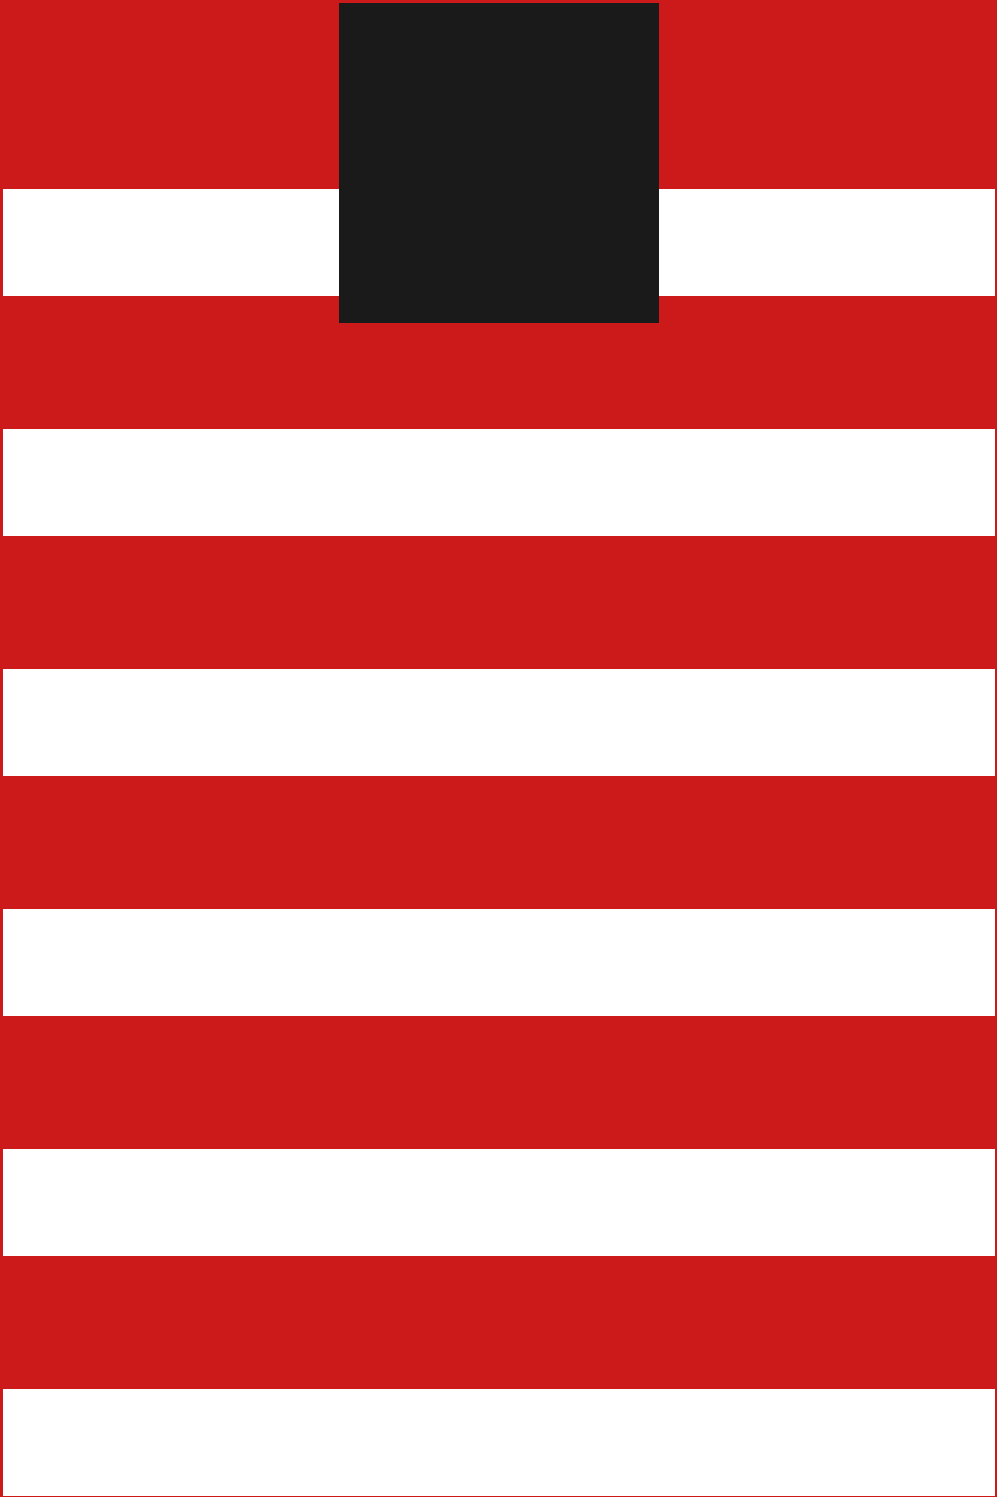

Grid System

Wall Lights

Wall lights, the light fixtures that attach to a wall panel, contain low-voltage lamps to light a product or graphics on walls. They are available in lengths from 18 inches to 42 inches. Note: the longer length is used to illuminate a large product or one placed away from a wall.
